Forecast for Saturday 10 Apr 2021

Weather: Dry with clear spells in the west during the early hours, but patchy low cloud may affect easternmost summits around dawn bringing some patchy fog. The morning will be dry with sunny spells, but isolated light sleet or snow showers are likely during the afternoon. Further light snow showers are likely through the evening, more especially across eastern and northeastern parts of the Beacons, and here some patchy low cloud may redevelop mid evening onwards.

Chance of cloud free mountain/hill tops above 600m: Generally 90% or better, although 30% in the east around dawn and again mid evening onwards.

Visibility: Generally very good with excellent clarity at most levels away from showers, but hazy on easternmost slopes around dawn and again on eastern and northeastern slope mid evening onwards with patchy cloud on slopes above 500-700m. Visibility will drop sharply in any passing sleet and snow showers with cloud base temporarily lowering to 700-800m.

Meteorologist's View

The brisk winds will make it feel cold on the higher routes throughout the day, and you may wish to pack extra layers for warmth. Some strong sunshine is likely through the middle of the day and into the afternoon, and sun protection is advised.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Fri 09 Apr 2021	4mm	4.4mm	4.6mm

Forecast for Sunday 11 Apr 2021

Weather: Isolated snow showers during the early hours, and patchy low cloud will bring fog to some easternmost summits. The low cloud will lift and disperse soon after dawn with much of the morning being dry with sunny periods. Scattered sleet and snow showers will develop by midday and continue through the afternoon, but they will die away by dusk leaving a dry evening with clear periods.

Maximum wind: Northerly 15-20mph.

Chance of cloud free mountain/hill tops above 600m: Generally 90% or better, although 30% in the east during the early hours.

Visibility: Generally very good with excellent clarity away from showers, but hazy at low levels on easternmost slopes at first with patchy cloud on slopes above 500-700m. Visibility will drop sharply in any passing sleet and snow showers with cloud bases temporarily lowering to 700-800m.

Temperature: **Valleys:** Minus 3 Celsius becoming plus 7 Celsius.
At 600m: Minus 2 Celsius becoming Zero Celsius.
Freezing level: All levels at first, rising to 600m during the day.
